PROFESSIONAL SUMMARY

IT and Application Support professional with a complementary background in data analytics and business intelligence. Experience spans incident triage, identity and access management, and endpoint support across enterprise and multi-client environments, alongside SQL/Python-based data analysis, ETL automation, and Power BI/Tableau reporting. Authorized to work in Canada without sponsorship.

SKILLS

- **IT & Application Support:** Incident triage, ticket ownership, ITSM tooling (ManageEngine ServiceDesk Plus), root-cause escalation, first-level and remote support
- **Identity & Access Management:** Active Directory (Users, Group Policy, Access Control, credential resets), Microsoft 365, Microsoft Intune, Apple Business Manager (ABM)
- **Devices & Networking:** Desktops, laptops, printers, peripherals, mobile devices — install, configure, troubleshoot, repair; TCP/IP, DNS, DHCP, VPN, Wi-Fi
- **Programming & Analysis:** Python (Pandas, NumPy, scikit-learn), SQL (queries, aggregations, window functions, joins), R, data cleaning and validation
- **Visualization & Reporting:** Power BI (DAX, KPI dashboards), Tableau, Advanced Excel, executive stakeholder reporting
- **Documentation & Governance:** Knowledge base authoring, SharePoint version control, audit-ready compliance records, process documentation

WORK EXPERIENCE

IT Technical Analyst

Jan 2026 – Aug 2026

ORNGE Air Ambulance, Mississauga, ON

- Maintained 95% SLA compliance across 100+ monthly enterprise incidents as measured by on-time resolution rate, by triaging and managing critical workflows within an ITIL-aligned ManageEngine ITSM framework
- Reduced repeat incident rate as measured by recurring-ticket volume, by escalating high-priority issues to L2 engineering teams with root-cause documentation and authoring knowledge base fixes
- Maintained zero unauthorized access incidents as measured by audit review, by managing user provisioning, credential resets, and Access Control in Active Directory across onboarding and offboarding workflows
- Cut device deployment turnaround as measured by readiness timelines, by imaging, configuring, and provisioning desktops, laptops, and mobile devices across Microsoft 365, Intune, and Apple Business Manager

IT Support Analyst

May 2024 – Nov 2024

Raulji Technologies, Vadodara, India

- Provided first-level technical support across multiple client environments as measured by ticket resolution turnaround, by triaging and resolving hardware, software, and connectivity issues via phone, email, and remote sessions
- Managed user identity and access across client systems as measured by zero unauthorized access incidents, by administering Active Directory (users, group policy, access control) and Microsoft 365 accounts
- Reduced recurring client issues as measured by repeat-ticket volume, by documenting root causes and authoring knowledge base articles for common technical problems

Data Analyst Intern

Jan 2024 – Apr 2024

V-Ex Tech Solution, Vadodara, India

- Cut manual report generation time by 30% as measured by processing time and data integrity, by engineering structured ETL workflows using SQL and automated processing
- Improved executive decision-making as measured by stakeholder adoption of insights, by developing interactive Power BI dashboards translating system logs into actionable business reporting
- Eliminated data anomalies across legacy systems as measured by data quality audits, by implementing validation and cleansing frameworks across enterprise data sources

PROJECTS

Ecommerce Sales Dashboard | Case StudyJuly 2026 – Aug 2026

- Built an interactive Power BI dashboard tracking YTD sales performance, connecting live to MS SQL Server and modeling data across three related tables
- Applied DAX time-intelligence functions and complex measures to surface YoY growth across sales, profit, quantity, and margin KPIs

IPL Data Analysis | Case StudyOct 2025 – Nov 2025

- Analyzed large-scale IPL match and player performance datasets using Python and Pandas to identify scoring patterns and team performance trends across seasons
- Built structured data pipelines to clean, transform, and aggregate raw match data into query-ready analytical datasets

EDUCATION

Master of Applied ComputingJan 2025 – Aug 2026
University of Windsor, ON GPA: 3.5/4.0

Bachelor of Science, Computer ScienceAug 2020 – May 2024
Babaria Institute of Technology, India GPA: 3.6/4.0

CERTIFICATIONS

- ITIL 4 Foundation Certificate — Service Standards & Customer-Focused Support
- Microsoft Azure AZ-900 — Target completion Nov 2026
- CompTIA A+ — In Progress, Target completion Dec 2026
- Google Data Analytics Professional Certificate — In Progress
