

SWAR PARIKH

Vadodara, India (Relocating August 2026) | swarparikhsv38@gmail.com | +91 8160559465 | LinkedIn | GitHub

CORE SKILLS

- **Data Analysis:** SQL (queries, aggregations, data modeling), Python (Pandas, NumPy, scikit-learn), anomaly detection, pattern recognition, trend analysis, data quality and validation
- **Visualization & Reporting:** Power BI (DAX, KPI dashboards), Tableau, Advanced Excel (pivot tables, charts, data manipulation), business insight development, executive stakeholder reporting
- **Tools & Platforms:** Google Workspace (Gmail, Docs, Sheets, Chrome), SQL Server, GitHub, Microsoft 365, ETL pipelines
- **Problem Solving & Communication:** Independent analytical thinking, structured documentation, knowledge sharing, cross-functional collaboration, translating data into actionable recommendations

PROJECTS

Bank Loan Portfolio Risk Analytics Dashboard | *GitHub*, Mar 2025 – Jun 2025

- Conducted custom analysis on **38,600+** loan records to identify risk patterns and anomalies; built a Python/scikit-learn risk prediction model achieving **86.2% accuracy** and developed a **Power BI dashboard with DAX-driven KPIs** and geospatial insights to quantify portfolio performance and support financial decision-making.

Flight Delay Prediction System | *GitHub*, Jul 2025 – Aug 2025

- Analyzed large-scale operational flight datasets using Python to identify delay patterns and performance bottlenecks; built predictive models evaluated on RMSE and MAE metrics, delivering structured analytical insights to support operational planning and process improvement.

WORK EXPERIENCE

Data Analyst Intern | *V-Ex Tech Solution, Vadodara, India* Jan 2024 – Apr 2024

- Automated ETL pipelines using SQL and Python, reducing manual report generation time by **30%** and improving data accuracy for downstream operational planning.
- Designed Power BI and Tableau dashboards to translate complex datasets into digestible business insights, presenting findings directly to senior stakeholders.
- Implemented data validation and cleansing protocols to identify and resolve anomalies across enterprise data sources, preserving data quality and integrity.

IT Technical Analyst (Co-op) | *ORNGE Air Ambulance, Mississauga, ON* Jan 2026 – Aug 2026

- Assessed and tracked 100+ monthly service data points, identifying recurring patterns and anomalies to support operational improvement and maintain **95% SLA compliance**.
- Created structured knowledge base documentation to share analytical findings and resolution patterns across the team, improving consistency and reducing repeat incidents.
- Maintained accurate, audit-ready data records supporting compliance reporting and operational performance reviews in a regulated healthcare environment.

EDUCATION

Master of Applied Computing Jan 2025 – Aug 2026

University of Windsor, Canada GPA: 3.5/4.0

Relevant coursework: Advanced Database Topics, Emerging Non-Traditional Database Systems, Advanced Systems Programming, Internet Applications & Distributed Systems

Bachelor of Engineering, Computer Science Aug 2020 – May 2024

Babaria Institute of Technology, Vadodara, India GPA: 3.6/4.0

CERTIFICATIONS

- Google Data Analytics Professional Certificate (In Progress) — SQL, R, Tableau; data cleaning, analysis, and visualization
- IBM Business Analyst Professional Certificate (In Progress) — Requirements elicitation, process mapping, analytical reporting
