

SWAR PARIKH

Toronto, ON | parikhswar.work@gmail.com | +1 (548) 994-5388 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CORE SKILLS

- **Programming & Analysis:** Python (Pandas, NumPy, scikit-learn), SQL (queries, aggregations, window functions, joins), R, data cleaning and validation, anomaly detection, pattern recognition
- **Visualization & Reporting:** Power BI (DAX, KPI dashboards), Tableau, Advanced Excel (pivot tables, charts, data manipulation), business insight development, executive stakeholder reporting
- **Data & Pipelines:** ETL automation, large-scale dataset analysis (38,600+ records), predictive modeling, data quality frameworks, feature engineering
- **Tools & Platforms:** Google Workspace (Gmail, Docs, Sheets, Chrome), SQL Server, GitHub, Microsoft 365
- **Methods:** Requirements gathering, structured documentation, knowledge sharing, cross-functional collaboration, translating data into actionable recommendations

PROJECTS

IPL Data Analysis | [GitHub](#),

Oct 2025 - Nov 2025

- Analyzed large-scale IPL match and player performance datasets using Python and Pandas to identify scoring patterns, team performance trends, and key performance dimensions across seasons.
- Built structured data pipelines to clean, transform, and aggregate raw match data into query-ready analytical datasets, identifying anomalies and validating data consistency throughout.
- Delivered visualizations distilling complex performance data into actionable findings, translating raw data into meaningful business narratives for non-technical audiences.

India Election Analysis | [GitHub](#),

Mar 2024 – Apr 2024

- Designed and executed a comprehensive SQL and Python analysis pipeline on national election results, executing 30+ queries to identify regional voting patterns and demographic trends across large multi-source datasets.
- Applied data aggregation, filtering, and cross-tabulation techniques to surface insights on constituency-level performance, party vote share, and swing analysis.
- Developed interactive visualizations translating complex electoral data into clear, actionable insights suitable for non-technical stakeholders.

WORK EXPERIENCE

Data Analyst Intern | *V-Ex Tech Solution, Vadodara, India*

Jan 2024 – Apr 2024

- Automated ETL pipelines using SQL and Python, reducing manual report generation time by **30%** and improving data accuracy for downstream operational and executive planning.
- Designed Power BI and Tableau dashboards to translate complex datasets into digestible business insights, presenting analytical findings directly to senior stakeholders.
- Implemented data validation and cleansing protocols to identify and resolve anomalies across enterprise data sources, preserving data quality and integrity for downstream analysis.

IT Technical Analyst (Co-op) | *ORNGE Air Ambulance, Mississauga, ON*

Jan 2026 – Aug 2026

- Assessed and tracked 100+ monthly service data points, identifying recurring patterns and anomalies to support operational improvement and maintain **95% SLA compliance**.
- Created structured knowledge base documentation to share analytical findings and resolution patterns, improving service consistency and reducing repeat incidents across the team.
- Maintained accurate, audit-ready data records supporting compliance reporting and operational performance reviews in a regulated healthcare environment.

EDUCATION

Master of Applied Computing

Jan 2025 – Aug 2026

University of Windsor, Canada GPA: 3.5/4.0

Bachelor of Engineering, Computer Science

Aug 2020 – May 2024

Babaria Institute of Technology, Vadodara, India GPA: 3.6/4.0

CERTIFICATIONS

- **Google Data Analytics Professional Certificate (In Progress)** — SQL, R, Tableau; data cleaning, analysis, and visualization
- **IBM Business Analyst Professional Certificate (In Progress)** — Requirements elicitation, process mapping, analytical reporting
